

Senior Manager Regulatory Operations
Sydney Catchment Authority
PO Box 323
Penrith NSW 2751

Via Email: info@sca.nsw.gov.au

Dear Regulatory Operations Manager

I refer to my letter of 12 December 2010 (copy attached) acknowledged as received by the Authority on 13 December 2010 in respect of an "Application for access to Sydney Catchment Authority Special Areas/Controlled Areas/Water Storages".

As the Authority's 28 day period for processing applications has expired (i.e. 10 January last day to advise me of the results of my application), I determine since no objection has been raised on the quantum, merit or reason for my application, I conclude by the absence of any correspondence of an objection by the Authority, my application of 12 December 2010 is therefore valid and is herewith granted without restriction/s.

I look forward to receiving instructions for entry to the area/s requested within 2 days of this letter.

Thank you in advance for your prompt attention.

Warmest regards
Greg Petty

Dear Regulatory Operations Manager

Please find attached an "Application for access to Sydney Catchment Authority Special Areas/Controlled Areas/Water Storages" form duly completed.

As the photo taken at Darkes Forest above shows, a "Special Area" exists. However, whilst residents are specifically excluded unless the above application is approved, mining and petroleum company's have unlimited access to these types of areas. Why would that be so and what can't the public see?

I believe it is in the public interest that the public should be aware what is happening in "it's" backyard and whilst I can appreciate appropriate security measures, inspections of such lands must at times be transparent to the public.

Residents have expressed concerns that the operations are not conducted in accordance with the License and are being breached. The inspection would also be to ensure that Sydney Catchment Authority is issuing breach notices on Licensee's where appropriate.

Therefore, I look forward to your approval of my application to inspect these lands "in the community interest" promptly. This application and your reply will be posted on the website www.gregpetty.com.au in due course as part of my election platform for greater public transparency in government decision making. Written reports and photographic record (2 cameras of same shots) will be supplied to SCA.

A reply (by email) by 20 December 2010 would be sincerely appreciated as inspections are scheduled to commence on 21 December 2010.

Warmest regards
Greg Petty
